Malaria Prevention

Consider celebrating [World Malaria Day](#) on 25 April by getting involved in a malaria prevention project. Malaria is a potentially fatal yet preventable disease that annually kills more than one million people and infects over 500 million. It is commonly transmitted by mosquitoes, but [mosquito nets](#) provide a safe, affordable, and effective form of disease prevention. They are designed to protect individuals from

disease-carrying mosquitoes by creating a barrier that the insects cannot permeate. Insecticide-treated mosquito nets not only provide protection but also kill mosquitoes in the process, benefiting the community at large. While mosquito nets can help in many situations, they are generally used at night, as mosquitoes tend to be more prevalent at dawn and dusk. Four people can sleep under one insecticide-treated bed net for four to five years.

[Read about](#) nongovernmental and Rotarian-sponsored organizations that are supporting malaria prevention projects.

Above: A volunteer dips mosquito nets into insecticide treatment to prepare them for use.

"Just as Rotary itself can never keep its place unless it is constantly growing, so each individual Rotary Club cannot afford to stand still while the stream of life moves onward."

— Armando de Arruda Pereira, 1940-41 RI president, in *The Rotarian*, February 1941

Rotary clubs have water projects on tap

By Arnold Grahl and Ryan Hyland
Rotary International News -- 22 March 2011

A child drinks clean water from a spigot in Haiti. A US\$64,566 contribution from the Haiti Earthquake Relief Fund is supporting a project of the Rotary Club of Mirebalais, Centre, to construct 80 rainwater collection tanks, each with a 2,500-gallon capacity. *Rotary Images/Alyce Henson*

Schools are being equipped with ventilated pit latrines, showers, and boreholes featuring hand pumps and mechanized pipes through the efforts of dozens of Rotary clubs in partnership with the Rotary Club of Luanshya, Zambia.

The effort is part of the ongoing push from the Centennial year projections and newly implemented Strategic Plan for the Rotary Club of Luanshya. Launched in 2005, it works to implement long-term, sustainable water, sanitation, and hygiene projects in the Luanshya School District and rural villages. The local club and its partners have supplied well over K10 billion in water programs, hygiene and sanitation.

With this collaboration, Rotary is taking the commitment to clean water and sanitation to the next level. We're not just focused on simply providing safe drinking water and walking away. We are looking at our ability to partner to make a larger impact in a bigger part of the world through sustainable projects and clean sanitation practices. Billions of people lack access to safe drinking water and proper sanitation.

To draw attention to the need for action, the United Nations has designated 22 March as World Water Day. Each year since 1993, it has selected a different theme. This year focuses on the impact of rapid urban growth and the challenges of urban water management.

Rotarians interested in water and sanitation can attend a workshop on the International H2O Collaboration, moderated by Thorfinnson, on 24 May at the 2011 RI Convention in New Orleans, Louisiana, USA. The Water and Sanitation Rotarian Action Group will also host a fourth annual World Water Summit on 20 May at the New Orleans Marriott.

If your club or district is interested in submitting proposed legislation to the 2013 Council on Legislation, start with the [2013 Legislation](#) page on the RI website.

The [2010 Report of Action](#) is also a good resource for understanding what a properly drafted proposal should contain. RI must receive all proposed legislation by 31 December 2011, including a completed [certification form](#) and a statement of purpose and effect.

Ali-Byes

A retired gentleman decided to fulfil his latent desire to own a snazzy red convertible. Taking it out for a spin, he revved it up to 120, 140 kph. Suddenly he saw flashing lights behind him, so he souped it up to 160, then realized he better stop and take his punishment.

The police officer approached his window and said, “I go off duty in 30 minutes. If you can tell me a story I haven’t heard from speeders before, I’ll let you go.”

The quick thinking oldster said: “A few years ago my wife ran off with a policeman, and I thought you were bringing her back.” He got off free.
